-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**DETAILED ACTION**

***Priority***

Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

***Claim Rejections - 35 USC § 112***

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-12 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 1, the only independent claim is vague and indefinite for the following reasons.

Line 1 in claim 1 defines a "first stack". Line 3 in the claim defines a term, "a second stack". The claim is vague and indefinite since it is not known just what is "stacked". It is not clear just what the stack comprises. Does it comprise electrodes? Does it comprise plates? Are the individual elements in the stack insulated from each other? From the present claim description it is not clear just what the stacks comprise and how they generate acoustical energy. Correction is required before the claims can be properly searched and examined in light of prior art. It is not clear how a temperature gradient is generated between the first and the second stacks since it is not clear just what generates the temperature. It is not clear just how the standing and traveling waves generate temperature since the proper structure and description of the individual elements and how they interact with each other, has been made clear. One of ordinary

skill in the art would not know how to make and use the same, given the present claim description.
